EDUCATION

BSc Computer Science — Eötvös Loránd University (ELTE)

September 2023 - July 2026

Faculty of Informatics · Thesis: Phishing Detection Using OSINT-Enhanced Features · Stipendium Hungaricum scholarship

🏆 Selected for BSc Computer Science at Tsinghua University — full scholarship (world #1 in CS, US News)

EXPERIENCE

Founder & Developer

March 2026 - Present

[backbencher.cc](#) — Building an open-core AST-native code intelligence platform. Indexes codebases into a queryable SQLite knowledge graph with 13 brain tools for semantic search, call-graph traversal, AST-precise refactoring, and security scanning across 39 languages.

TypeScript Tree-sitter SQLite Bun LSP MCP

Full-Stack Developer

September 2025 - Present

[ProxiCall](#) — Developing a production Flutter proximity super-app with Stripe Connect payments, geo-fencing, 32-language auto-translation, and geo-targeted notifications with AI segmentation. Built 5 integrated systems: CMS, PMS, OMS, NMS, and ENS.

Flutter Node.js Supabase Firebase Stripe Sentry

Privacy & Security Intern

September 2024 - May 2025

Hands-on training in privacy-preserving technologies and OSINT. Worked with secure operating systems, anonymous communication tools, PGP encryption, and advanced information gathering techniques including Shodan and social media reconnaissance.

Tails OS SecureDrop OnionShare PGP/GPG Parrot Security OSINT Shodan VPNs

Wireless Network Security Intern

July 2022 - February 2023

Practical training in wireless network penetration testing and vulnerability assessment. Gained proficiency with industry-standard tools for network reconnaissance, packet analysis, and exploitation.

Bettercap Aircrack-ng Nessus Burp Suite Nmap Wireshark

Pentester Intern

April 2020 - September 2020

Remote internship during COVID-19 focused on offensive security. Learned payload generation, Android APK reverse engineering, web application attacks including XSS, and post-exploitation techniques with Metasploit.

Kali Linux Metasploit Termux APK Tool XSS Payloads Backdoor Factory

PROJECTS

backbencher.cc (bb) [live](#) · [repo](#)

My primary project — an open-core AST-native code intelligence platform that indexes entire codebases into a local SQLite knowledge graph. Ships with 13 brain tools for semantic search, call-graph traversal, AST-precise refactoring, architectural pattern detection, cross-language migration, and security scanning across 38 languages.

TypeScript Tree-sitter SQLite Bun PowerShell SST

ProxiCall [live](#) · [repo](#)

Production Flutter proximity super-app — location-based content delivery, Stripe Connect payment management, order management, 32-language auto-translation, and geo-targeted notifications with AI segmentation.

Flutter Node.js Supabase Firebase Stripe Sentry

PhishGuard [live](#) · [repo](#)

BSc Thesis — phishing detection system combining XGBoost ML (96.45% accuracy), NLP with 10 tactic detectors, and OSINT enrichment (WHOIS, DNS, VirusTotal).

Python Next.js XGBoost SHAP scikit-learn

tree-sitter-clean [repo](#) · [npm](#)

Clean grammar for tree-sitter — enables code intelligence, syntax highlighting, and AST parsing for the Clean programming language.

Tree-sitter

JavaScript

Grammar

hide-and-lock [repo](#)

CLI utility for encrypting sensitive files with session-based isolation and master key recovery.
