PROFILE

Computer Science graduate from ELTE, Budapest. Founded **backbencher.cc**, an AST-native code intelligence platform shipping 13 brain tools for semantic search, call-graph traversal, AST-precise refactoring, and security scanning across 39 languages. Contributed to **Microsoft VS Code** (3 fixes merged) and **Flutter** (security hardening and gesture engine fix). Built **ProxiCall**, a production super-app with Stripe Connect payments and 32-language translation. BSc thesis on ML-based phishing detection achieved 96.45% accuracy across 725 automated tests.

EDUCATION

BSc Computer Science — Eötvös Loránd University (ELTE) September 2023 - July 2026
Faculty of Informatics. Stipendium Hungaricum scholarship. Selected for **Tsinghua University** (world #1 in CS, US News) with full scholarship.

EXPERIENCE

Founder & Developer March 2026 – Present
backbencher.cc

Building an open-core code intelligence platform that indexes codebases into a SQLite knowledge graph. Ships 13 brain tools (bb_search, bb_select, bb_refactor, bb_security, bb_migrate, bb_relationships, and more). Benchmarked against TypeScript and Roslyn codebases.

Full-Stack Developer September 2025 – Present
ProxiCall

Production Flutter super-app: Stripe Connect payment management, geo-fenced content delivery, 32-language auto-translation, and AI-segmented push notifications. Five integrated systems: CMS, PMS, OMS, NMS, ENS.

OPEN SOURCE CONTRIBUTIONS

- Microsoft (VS Code)**
- #319804 Performance optimization for VS Code's editor component caching computed styles.
 - #319806 Improves debugging DX by logging breakpoint/watch expression load errors.
 - #314005 Fixed listener leak when rerendering title file widgets in chat content parts.

- Flutter**
- #186076 Security hardening — prevents command injection in Flutter dev tooling scripts.
 - #187008 Fixed stale eagerWinner reference in GestureArenaManager when gesture rejected before arena close.

PROJECTS

- **backbencher.cc (bb)** [\[site\]](#) · [repo](#) · [benchmark](#)
My primary project — an open-core AST-native code intelligence platform that indexes entire codebases into a local SQLite knowledge graph...
- **ProxiCall** [\[site\]](#) · [repo](#)
Production Flutter proximity super-app — location-based content delivery, Stripe Connect payment management, order management, 32-languag...
- **PhishGuard** [\[site\]](#) · [repo](#)
BSc Thesis — phishing detection system combining XGBoost ML (96.45% accuracy), NLP with 10 tactic detectors, and OSINT enrichment (WHOIS,...
- **tree-sitter-clean** [\[repo\]](#) · [npm](#)
Clean grammar for tree-sitter — enables code intelligence, syntax highlighting, and AST parsing for the Clean programming language.
- **hide-and-lock** [\[repo\]](#)
CLI utility for encrypting sensitive files with session-based isolation and master key recovery.
- **phantomVault** [\[repo\]](#)
Secure C++ storage utility with encryption support.

TECHNICAL SKILLS

Languages TypeScript, JavaScript, Python, Dart, C++, Shell/Bash, PowerShell, SQL, HTML/CSS, Java
Frameworks Flutter, Next.js, React, Node.js, Express, Tailwind CSS, Flutter Bloc, tRPC
AI & Models OpenAI API, Google AI Studio, Mistral, Cohere, GitHub Copilot, Claude Code, Antigravity, OpenCode, backbencher, DeepSeek v4 Pro, MiniMax M2.7, Kimi K2.6, Sonnet 4.6, Gemini 3.1 Pro Preview, GLM 5.1
Tools & Platforms Git, VS Code, Bun, npm/pnpm, Tree-sitter, LSP, MCP, curl/jq · Supabase, Firebase, Stripe, Docker, GitHub Actions, SST (Serverless Stack), SQLite, PostgreSQL, Sentry, Mapbox, Brevo, Zoho, Vercel, Netlify
